

Inheritance:
Each child class inherits all of the attributes & methods, unknown or known, of the mother class.

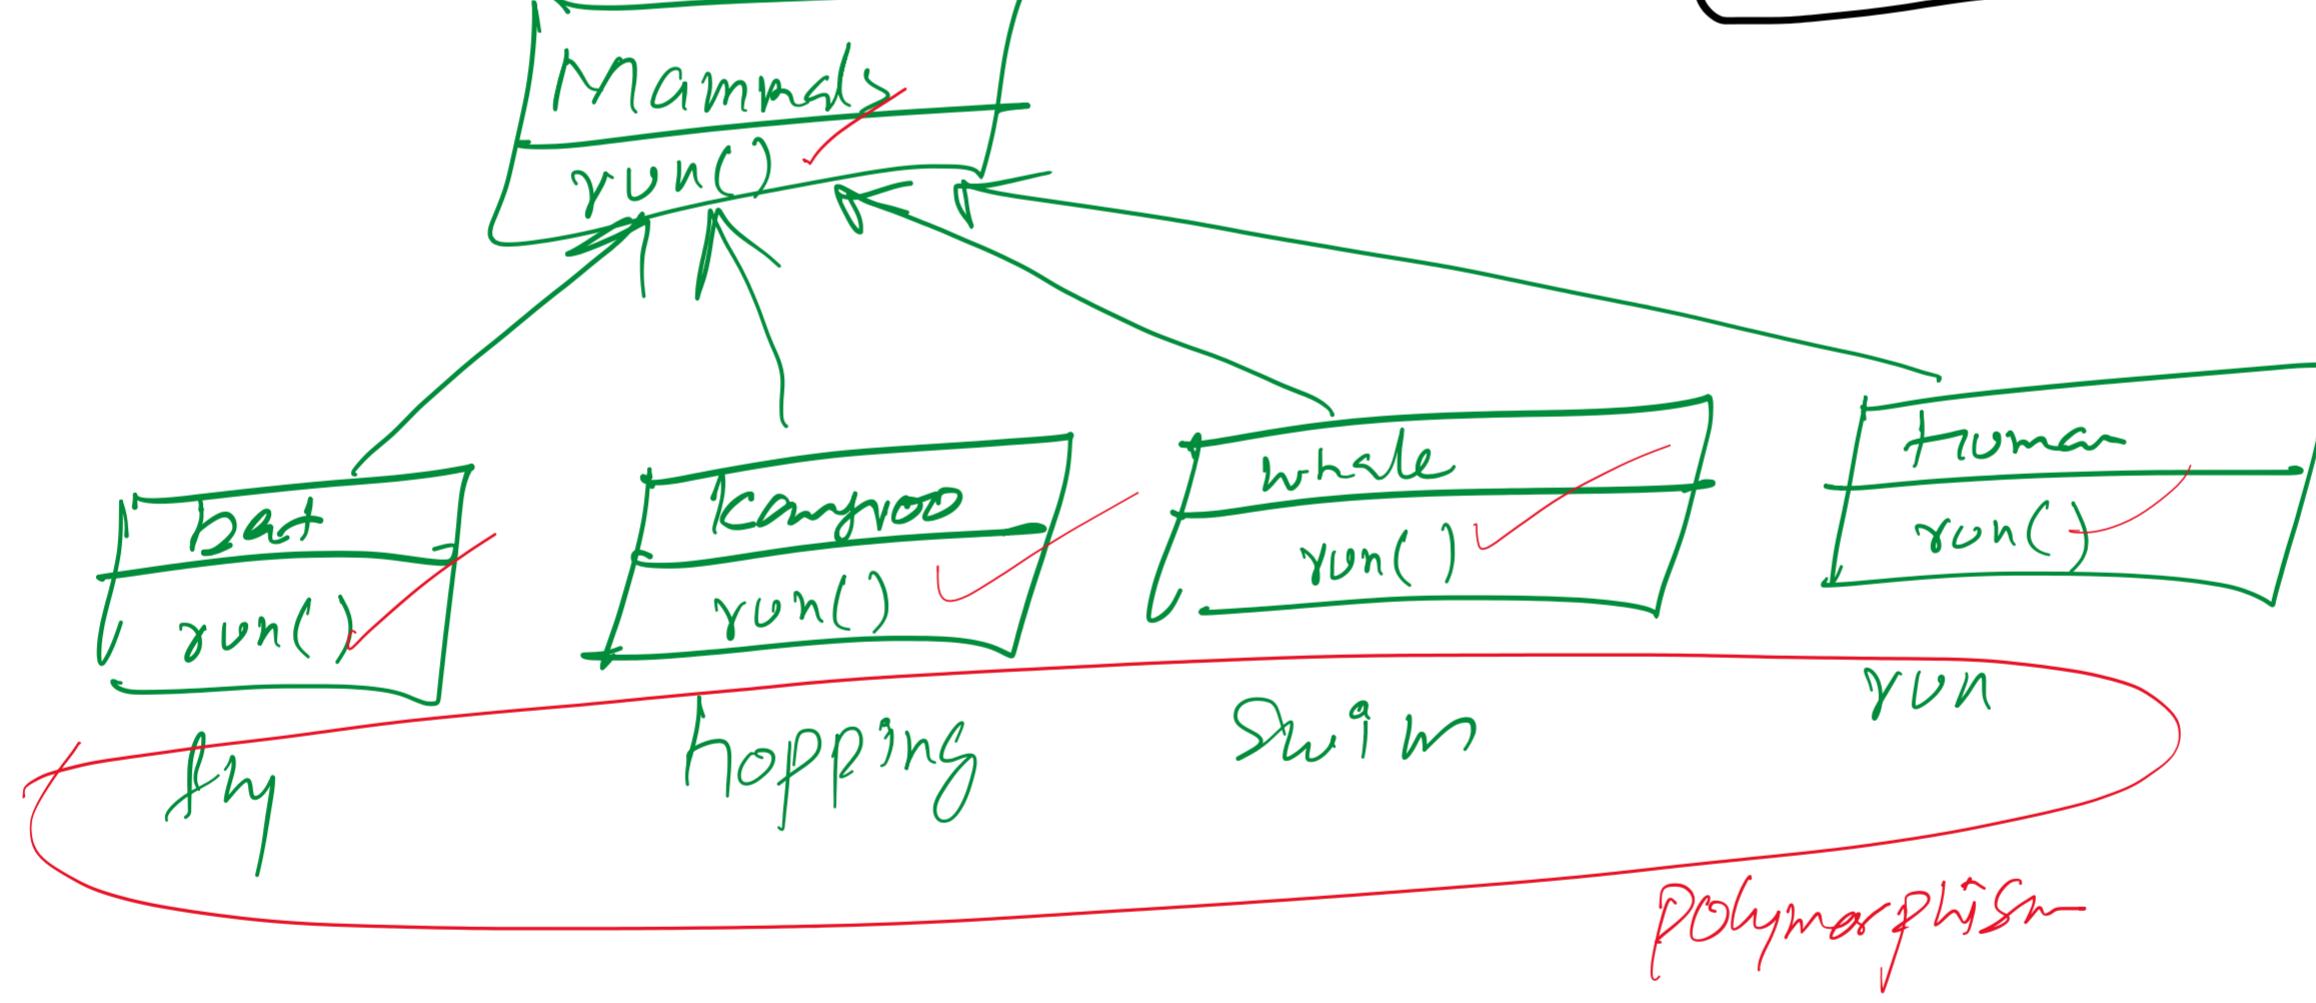

Actions after inheritance:

1. Use as is *n/a*
2. Change/extend *n/a*
3. add more *n/a*

Override

Polymorphism:
When method name is same in both mother & child classes but behaviour is different.

Aggregation / Containment:

Containment / Aggregation:

A class object is contained in another class.
